Introduction

Once again it is our pleasure to present you with a copy of our new wholesale list.

As always, our endeavor is to grow the finest plants possible. By selecting the better type plants of all varieties and propagating from them we believe we have accomplished much toward this end. All our plants receive the best possible care: they are root pruned and transplanted so as to develop a fine root system, they are sheared, sprayed, fed, cultivated and watered to assure compact clean plants. Your orders are dug and handled by experienced men in the very finest manner. Our every effort is directed toward developing and growing good heavy plant material offered at the lowest possible price and to merit your confidence and good will.

A price list is indeed a very poor indication of quality. We are offering quality plant material at a fair price, not "selling price" and feel that the value of a plant is seen rather than described. We urge you most cordially to visit our nurseries and inspect our acreage of plant materials. This year in particular we can offer outstanding blocks of many varieties. Our nurseries are located on Rt. 73, three miles south of Reading, Pa. at the village of Angelica.

Yours respectfully,

ANGELICA NURSERIES
